PN: Exhibit G is intended to prescribe basic security requirements applicable to a particular Scope of Work (SOW). The Requester's Deployed Security Officer (DSO) or Security Program Lead (SPL) is integral to the Exhibit G process and shall work with the STR/AdSTR or Requester to tailor Exhibit G; act as reviewing official for the final content of applicable sections of Exhibit G and for any supplemental security plan attached to Exhibit G; they shall also act as subject matter experts on security issues except for cyber security issues. The P.R. number and date shall be filled in the footer of Exhibit G. Each time that Exhibit G is revised, a new date shall be inserted in the footer for document control purposes.

DSO's and SPL's creating Exhibit G's shall determine any cross-organizational impacts of the associated Scope of Work and coordinate the completion of the Exhibit G's with other DSOs or SPLs impacted by the SOW. If a SOW impacts more than one LANL organization, the DSO/SPL creating the Exhibit G and the DSO/SPL of impacted organizations shall jointly determine whether an ASP is required. The coordination and requirement for an ASP should be documented in the Preparer's Notes in the Exhibit G.

Prior to submission of a tailored Exhibit G to Procurement, all required reviews and approvals shall be obtained and shown on the "REQUIRED REVIEWS AND APPROVALS" sheet to be submitted to procurement along with the tailored Exhibit G. However, the "REQUIRED REVIEWS AND APPROVALS" sheet is an internal document only and should not be sent to a proposed Offeror or Subcontractor.

If the DSO or SPL determines that a subsection is not applicable to the SOW of a proposed subcontract, the text of that subsection should be deleted (pursuant to the Preparer's Note instruction for each section), but not the subsection title or number. If the text of a subsection is deleted, the words "[Not Applicable]" must be inserted after the title of the subsection. When the table of contents is updated as stated in the preparer note shown in the yellow box above, the clause title in the table of contents will contain the [Not Applicable] designation.

The DSO or SPL may add additional security requirements within a new section titled "G10.0 Additional Requirements", if the current requirements in Exhibit G are not sufficient to address the security needs associated with the SOW. Any additional security requirements must comply with LANL policies and state in a clear, concise and unambiguous manner the requirements of LANL's Prime Contract with DOE/NNSA and applicable Federal, State, and local laws and regulations, including DOE Directives. Any language intended to be added to this Exhibit must be reviewed by Lab Counsel for legal sufficiency before incorporating the language into Exhibit G.

**Instructions on how to update the Table of Contents (TOC)** on a PC after the Exhibit G has been tailored: highlight the TOC; right-click mouse; a box will appear, select "update field". Another box will appear; select "Update entire table". TOC should be updated; highlight TOC and choose "Arial 9 for font, as updating increases the font to too big of size. Font 9 will allow the TOC to remain on one page.

SUBCONTRACTOR shall ensure that the ISSM five-step process (or an equivalent process) is followed by all Subcontract Workers.

- (1) Define the Scope of Work.

- (2) Analyze the Security Risk.
- (3) Develop and Implement Security Controls.
- (4) Perform Work within Security Controls.
- (5) Ensure Performance.

3.5 Security Stop Work PN: [Include this subsection in all on-site subcontracts. If work is going to be performed entirely off-site, delete the text of subsection 3.5 in its entirety and insert the words “\[Not Applicable\]” at the end of the subsection title \(i.e., 3.5 Security Stop Work \[Not Applicable\]\).](#)

When any Subcontract worker observes a security related hazard or unmitigated risk, the worker has the authority and responsibility to inform any worker engaged in that work that the work be stopped.

3.6 Reporting Security Incidents PN: [Include subsection in all subcontracts. \[P201-3 Rev 2, DOE M 470.4B Chg. 2\]](#)

This subsection contains requirements for identifying and reporting known and potential incidents of security concern. Such incidents may involve issues associated with Personally Identifiable Information (PII), ECI, UCNI, classified matter, computer systems, nuclear materials, secure communications, personnel security occurring on-site or off-site; and physical security occurring on LANL property, Laboratory-leased property or SUBCONTRACTOR-owned property. Subcontract workers shall comply with the following requirements.

3.6.1 *Immediately* upon discovery of a potential and/or reasonably suspected incident of security concern, report such concern to the Security Incident Team (SIT) (505-665-3505) or a SPL / DSO; and inform the RLM, and STR/AdSTR. During normal business hours, notifications shall be made only in person or through secure communications (STU or STE) as required below. A non-secure telephone, non-secure fax, non-secure voice mail, or non-secure electronic mail shall not be used to report a potential incident of security concern.

3.6.1.1 The potential compromise of PII shall be reported *immediately* upon discovery to the SIT or SPL / DSO. A potential compromise of PII is considered a serious information security incident because of the possibility of significant adverse

consequences to the individual whose data has been compromised.

3.6.1.2 *Immediately* report all security incidents and potential threats and vulnerabilities involving LANL data utilized by the SUBCONTRACTOR to the SIT or SPL / DSO, and then notify the appropriate ISSO or OCSR, RLM and STR/AdSTR.

3.6.1.3 After discovery of any incident involving the loss, compromise, or unauthorized disclosure of classified matter, report the incident *immediately* to the SIT or SPL / DSO, then inform the assigned OCSR, RLM and STR/AdSTR.

3.6.1.4 After discovery of any incident involving the loss, theft, diversion, or unauthorized use of nuclear material, report the incident *immediately* to Material Control & Accountability Group or the SIT or SPL / DSO.

### 3.6.2 Contact Requirements Outside of Normal Business Hours

For all incidents contact the Security duty officer through the Protective Force at 505-665-7708, *immediately* after discovery of a potential incident of security concern. The Security on-call duty officer may ask to meet with the SUBCONTRACTOR in person so that SUBCONTRACTOR may report such known or potential incidents of security concern, if secure communications are not available.

### 3.7 Workplace Violence **PN: Include subsection in all subcontracts. [P724 Rev 3]**

LANL maintains a work environment that is free from violent behavior and threats of violence. Violent behavior and threats of violence are unacceptable conduct and are prohibited. Any subcontract worker who participates in workplace violence will be barred from the LANL worksite and their employer shall be notified. Workplace violence is behavior that involves:

- hostile or aggressive physical contact with another person;
- a statement or body gesture that threatens harm to another person; or
- a course of conduct that would cause a reasonable person to believe that they are under threat of harm.

## **G4.0 Physical Security (Oct 2020) **PN: This section contains subsections that may not be applicable to all subcontracts. Therefore, each subsection must be reviewed to determine if it is applicable to the performance of the SOW [P202-5 Rev 4, P204-2 Rev 15, P202-2 Rev 7, P202-4 Rev 7, P202-6 Rev 4, DOE O 473.3A Chg 1].****

### 4.1 Prohibited Articles **PN: Include this subsection in all subcontracts.**

Prohibited Articles are those items never permitted on DOE property (e.g. LANL), which includes leased facilities and parking lots. UCNI documents shall be transmitted using a fax machine that employs encryption. When transmitted via fax or e-mail outside LANL, UCNI shall be encrypted with NIST-validated encryption software. E-mails with UCNI attachments are considered transmittal documents and shall be marked and encrypted as such.

If mailing outside of LANL, an opaque envelope shall be used and the outer packaging shall not indicate that the content within is UCNI. For interoffice mail, an interoffice envelope shall be used and mailed through standard interoffice mail, but do not indicate that the content is UCNI. When using e-mail, UCNI shall be encrypted with NIST-validated encryption software such as Entrust®.

#### 6.2.5 Destroying
